

Harshit Vats

Software Engineer | Flutter & Backend Development

Sonipat, Haryana, India | harshitvats237@gmail.com | +91 9518437050 | linkedin.com/in/harshit-vats | github.com/harshitvats27

Professional Summary

Computer Science undergraduate at VIT Bhopal University building **GrabKart**, a personal startup developing a pan-India e-commerce ecosystem alongside SwiftChat and Secure Learn using Flutter and Firebase. Independently published **Aegis**, a personal safety application, on the Google Play Store, and built robust applications using C++ (Qt) and Java (Spring Boot). Seeking a Software Engineering Internship to contribute to reliable, scalable, and user-focused products.

Education

B.Tech in Computer Science Engineering, VIT Bhopal University
CGPA: 8.90

Sep 2023 – May 2027

Schooling (CBSE), Little Angels School, Sonipat
Class X: 95.2% Class XII: 93%

Apr 2019 – Apr 2023

Technical Skills

Languages: Java, C++, Python, SQL, Dart

Backend: Spring Boot, REST APIs, CRUD, Authentication

Mobile & App: Flutter, Android (Java, XML), Qt 6 (QML)

Databases: PostgreSQL, Firebase (Firestore, Realtime DB)

Tools & Cloud: Git, Android Studio, Retrofit, Sockets (UDP/TCP), Azure (DP-900)

Core CS: Data Structures and Algorithms, Computer Networks

Projects

GrabKart – Founder & Developer (Personal Startup)
Flutter & Android + Firebase | Pan-India e-commerce ecosystem

2025 – Present

- Developed an e-commerce ecosystem featuring three dedicated apps: **GrabKart** (Play Store Closed Testing | [GitHub](#)), **Command Admin** (Play Store Closed Testing | [GitHub](#)), and **Delivery** (Play Store Closed Testing | [GitHub](#)).
- Implemented secure authentication, real-time product cataloging, and order tracking using Flutter and Firebase.

Aegis – Personal Safety Application
Android (Java) + Firebase | [Live on Google Play Store](#) | [GitHub](#)

2026

- Published on Google Play; sends emergency alerts with live location tracking to trusted contacts during critical situations.
- Implemented Firebase authentication and a real-time database to securely manage user and alert data.

LANChat – Peer-to-Peer Local WiFi Chat App
C++17, Qt 6 (QML), UDP/TCP Sockets | [GitHub](#)

2026

- Built a serverless LAN messaging app utilizing dynamic UDP peer discovery and direct TCP sockets for low-latency P2P chat.
- Implemented presence management (visibility toggling) and chat persistence, completely decoupling the QML UI from the C++ backend.

SwiftChat – Real-Time Messaging App
Flutter + Firebase | Play Store (Closed Testing) | [GitHub](#)

2025

- Real-time messaging application currently in closed testing, featuring instant chat synchronization.
- Optimized backend architecture for low-latency database queries and reliable message delivery.

Secure Learn – Online Learning Platform
Flutter + Firebase | Play Store (Closed Testing) | [GitHub](#)

2025

- Scalable e-learning application in closed testing phase, offering course management and role-based access control.
- Integrated secure user authentication and robust data models for seamless content delivery.

Econnect12 – Student Management System
Android App + Spring Boot + PostgreSQL | Full-Stack Developer | [GitHub](#)

2024 – 2025

- Built a backend system with Spring Boot and PostgreSQL, implementing secure CRUD operations and role-based access.
- Designed RESTful APIs and integrated them with an Android client via Retrofit, optimizing database queries.

Co-Curricular Activities

Tech Head, Haryana Club, VIT Bhopal University

2024 – Present

- Led technical initiatives, managing digital platforms and coordinating with teams to build event-related systems.

Event Coordinator, Electric Vehicle Club, VIT Bhopal University

Sep 2024 – Mar 2025

- Coordinated technical workshops and served as a key organizer for **Advitya**, the university's flagship fest.

Hackathons

OneJourney Mobility Hackathon 2026 – Built **Aegis**, a zero-click safety app concept for urban commuters.

Participant

HackShastra Hackathon (Unstop) – Designed and prototyped a software solution in a timed online hackathon.

Participant

CyberShield Hackathon (VIT Bhopal) – Built security-focused solutions in a university-level hackathon.

Participant

Certifications

Android App Development Certification, Imarticus Learning | [View](#)

May – Jun 2025

Azure Data Fundamentals (DP-900), Microsoft | [View](#)

May – Jun 2025
